You can now access the *Journal of Endodontics* online through the AAE Web site at www.aae.org. The site features:

**Online Table of Contents**
This link will take you to the table of contents for the most current issue of the JOE. Interested in what’s coming in the next issue? This site will have it first.

**Instructions for Authors**
Review an electronic version of the JOE instructions to authors.

**Guidelines for Publishing Papers in the JOE**
These guidelines provide a detailed and practical review of tips for preparing and editing manuscripts, figures and tables for publication.

**Scientific Advisory Board**
The editors have greatly expanded the Scientific Advisory Board to facilitate an electronic peer review of all manuscripts submitted to the JOE. We thank these colleagues who generously share their expertise. We will post the names of Scientific Advisory Board members throughout the year on the Web site and publish them annually in the December issue of the JOE.

**EndNote™ Library**
The editors of the JOE are pleased to provide this free downloadable library of the titles and abstracts of papers published in the JOE since 1975. The software program permits searching by author, year or keyword, and EndNote™ is also helpful in both designing research studies and in writing manuscripts. Moreover, the EndNote™ software program automatically formats references into the correct style for the JOE (to do this, select “Styles” from the menu, open the “Medicine” folder and click on “Vancouver” to run the correct reference style). The editors will update this JOE library periodically throughout the year. Users must purchase the EndNote™ software program to use this feature (see www.endnote.com for more information).

Publication of this supplement was supported by Septodont.

The opinions or views expressed in this professional education supplement are those of the authors and do not necessarily reflect the opinions or recommendations of Septodont.

Dosages, indications, and methods of use for products that are referred to in the supplement by the authors may reflect their clinical experience or may be derived from the professional literature or other clinical sources. Because of the differences between *in vitro* and *in vivo* systems and between laboratory animal models and clinical data in humans, *in vitro* and animal data may not necessarily correlate with clinical results.

“The statements, opinions and advertisements in the Journal of Endodontics are solely those of the individual authors, contributors, editors or advertisers, as indicated. Those statements, opinions and advertisements do not reflect any endorsement by the American Association of Endodontists or its agents, authors, contributors, editors, advertisers or the publisher. Unless otherwise specified, the American Association of Endodontists and the publisher disclaim any and all responsibility or liability for such material.”
